CARLOS HENRICH
(1965)

O LOBO SENTADO - Cordofone

Escultura sonora 2015

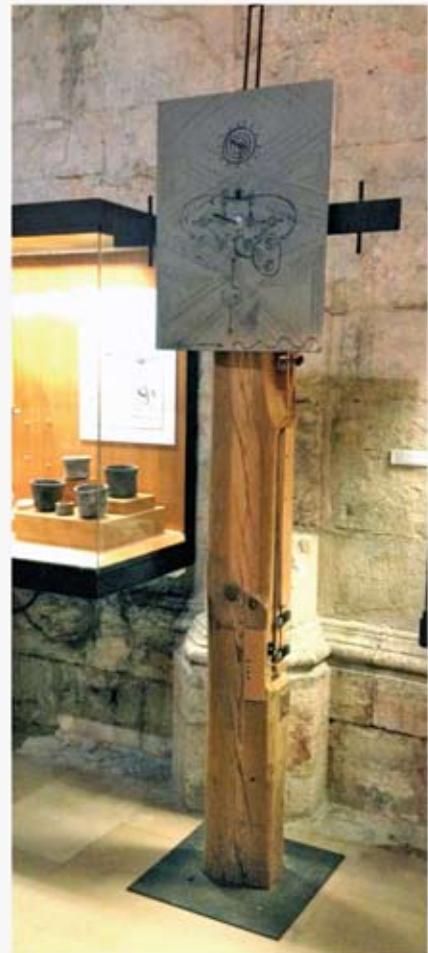

Madeira de Choupo, arame de pneu, alto-falante, pickups de guitarra, 190 x 50 x 50 cm

Exposições e livro:

- O LOBO SENTADO, Travessa da Ermida - Belém 2015
- “Carmo, Chiado e a República Litterária - Artes na Esfera Pública”, Lisboa, Paris, Auckland, Granada e Lódz, por José Quaresma, Museu Arqueológico do Carmo - Lisboa 2017, pág. 250

O LOBO SENTADO 2015

PLACA SONORA 1986

O LOBO SENTADO - Cordofone inspirado nos primórdios da comunicação humana. Os "Ideofones" ou "Idiofones" são instrumentos musicais ancestrais usados em várias culturas tanto para fins de rituais como de comunicação. Dado o seu elevado poder de ressonância acústica, é ouvido principalmente na alvorada e ao final da tarde, quando as frequências baixas se propagam a longa distância. Inspirei-me em histórias que me foram contadas de comunicação por ritmos, tambores e objetos similares Angolanos, que vi e toquei nos anos 80. Esculpido a partir de árvores de Choupos que cortei em meu atelier.

O título, O Lobo Sentado vem da forma da peça que sugere um animal sentado, o Sansão. A parte do "Lobo" vem de minha crítica à instrumentalização de palavras e acontecimentos, como a expressão "O Lobo Solitário", tanto utilizada em atentados não só na França. Com essa simples frase, anula-se a investigação em relação a CUI BONO (a quem serve). Nesta obra, o Lobo está sentado, como que descansando mas presente, pronto para entrar em ação. Quando tocado, ocupa o espaço sonoro, propagando ritmos cuja mensagem só pode ser entendida de forma lúdica.

CARLOS HENRICH

"Ressonância 7.84" (parceria Kazike), 2009

Esfera em resina de poliéster - diâmetro 90 cm, Auto falante

Sub Audio Oscillator (C946 Club Of The Knobs) por Kazike,
Amplificador, Rede em nylon, Mala de alumínio, Latex, Estetoscópio

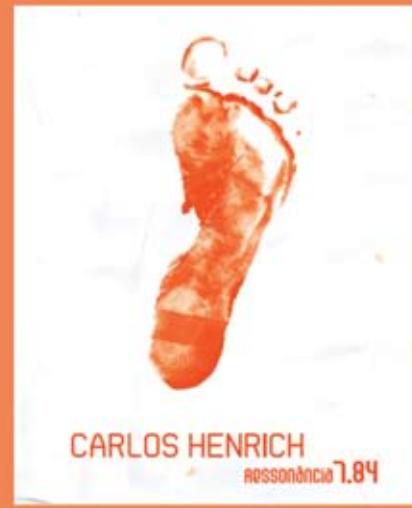

Planetary RESONANCE is the seconds pointer on the clock of human self-cognition, it is the triangle in the biological symphony. The spinning of the planet before the Sun is the metronome that keeps the rhythm - there is LIFE! Following its stability, amoebas like in an omnífágico stage develop to the intelligent being. Preceding the seed, they form the future intellectual or spiritual sphere. Assuming continuity, how far can we go?

RESONANCE 7.84 - Translucent sphere vibrating in the frequency of the planet EARTH with a frequency generator "CLUB OF THE KNOBS - analog modular synthesizer", by KAZIKE, which transcending physics electronic engineering, elevates them to the level of ART.

“... artists can produce vibrations of an earthquake and a film creator the sound of an egg being fried in a pan... audible or non-audible”.

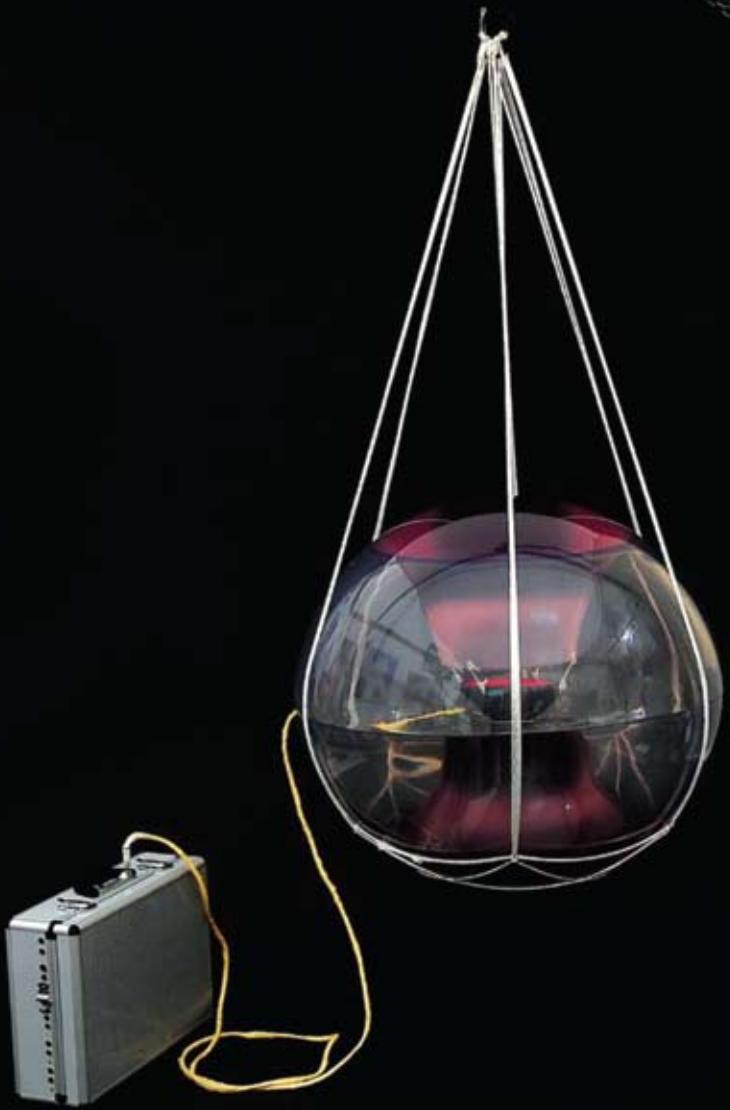

In the fragile drama of this human age, Love and Humor are convoked to act before a translucent sphere where the inaudible becomes visible.

OS PULA PRA CUITÔ

CARLOS HENRICH

2016

Sound sculpture

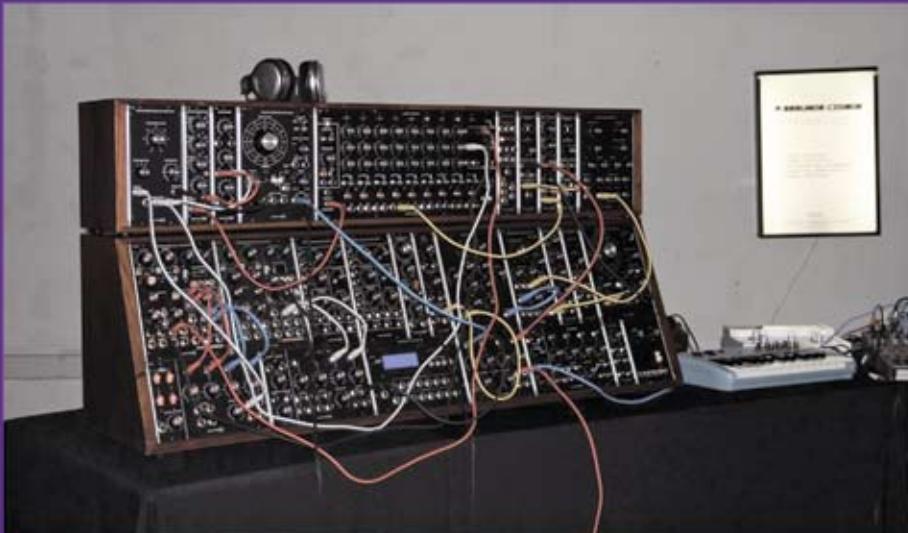

@ Lisboa Cidade Aberta Exhibition

"Idiophones" are ancestral musical instruments used in various cultures for both ritual and communication purposes. Due to its high acoustic resonance power, it is heard mainly at dawn and in the late afternoon, when low frequencies propagate at long distances.

"I took inspiration from stories told of rhythm communication - drums and similar Angolan objects - that I saw and played in the 80s. I then sculpted them out of Poplar trees that I cut in my studio.

"Os pula pra Cuito intends to return to certain roots where cultures have elaborated a communication of men to nature, and of nature to men, who, as a spiritual entity participates in the collective of the nation and is connected to the earth. I see in this, future communities sharing technologies and creating sustainable ways of managing the Planet." Carlos Henrich

HENRICH / MARTIAL

ETHNOSPHERE

CARLOS HENRICH

VINCENT MARTIAL

ETHNOSFERE - ESCULTURAS SONORAS

18 SETEMBRO - 7 OUTUBRO

CONCERTOS: 20 / 22 SET. / 2 OUT. 21H

MUSEU DE LISBOA - TEATRO ROMANO

IE: 21 568530

SEGEAC   

The term “Ethnosphere” was coined by anthropologist Wade Davis. He states, “You might think of the ethnosphere as the sum total of all thoughts and dreams, myths, ideas, inspirations, intuitions brought into being by the human imagination since the dawn of consciousness. The ethnosphere is humanity’s great legacy. It’s a symbol of all that we are, and all that we can be as an astonishingly inquisitive species. And just as the biosphere is being severely eroded, so too is the ethnosphere, and if anything, at the far greater rate.”

I heartily believe that the work of the artists present in the project illustrates the influence of the collective unconscious, meaning that it reflects how the ethnosphere acts upon us, as in my opinion artistic creation is the realm where influences in general can be more evidently tracked down.

This first encounter between Carlos Henrich and myself is a plastic and sound improvisation, within it two peculiar journeys intersect, drawing a sketch of diversity.

Vincent

Carlos Henrich and Vincent Martial create an entity of sound sculptures, a weave of matter and movements, of inspired and inspiring sonorities, an ensemble both organic and technologic, imposing and subtle.

Following their encounter they staged a performative installation composed of nine partly robotized sound sculptures with which they interact musically.

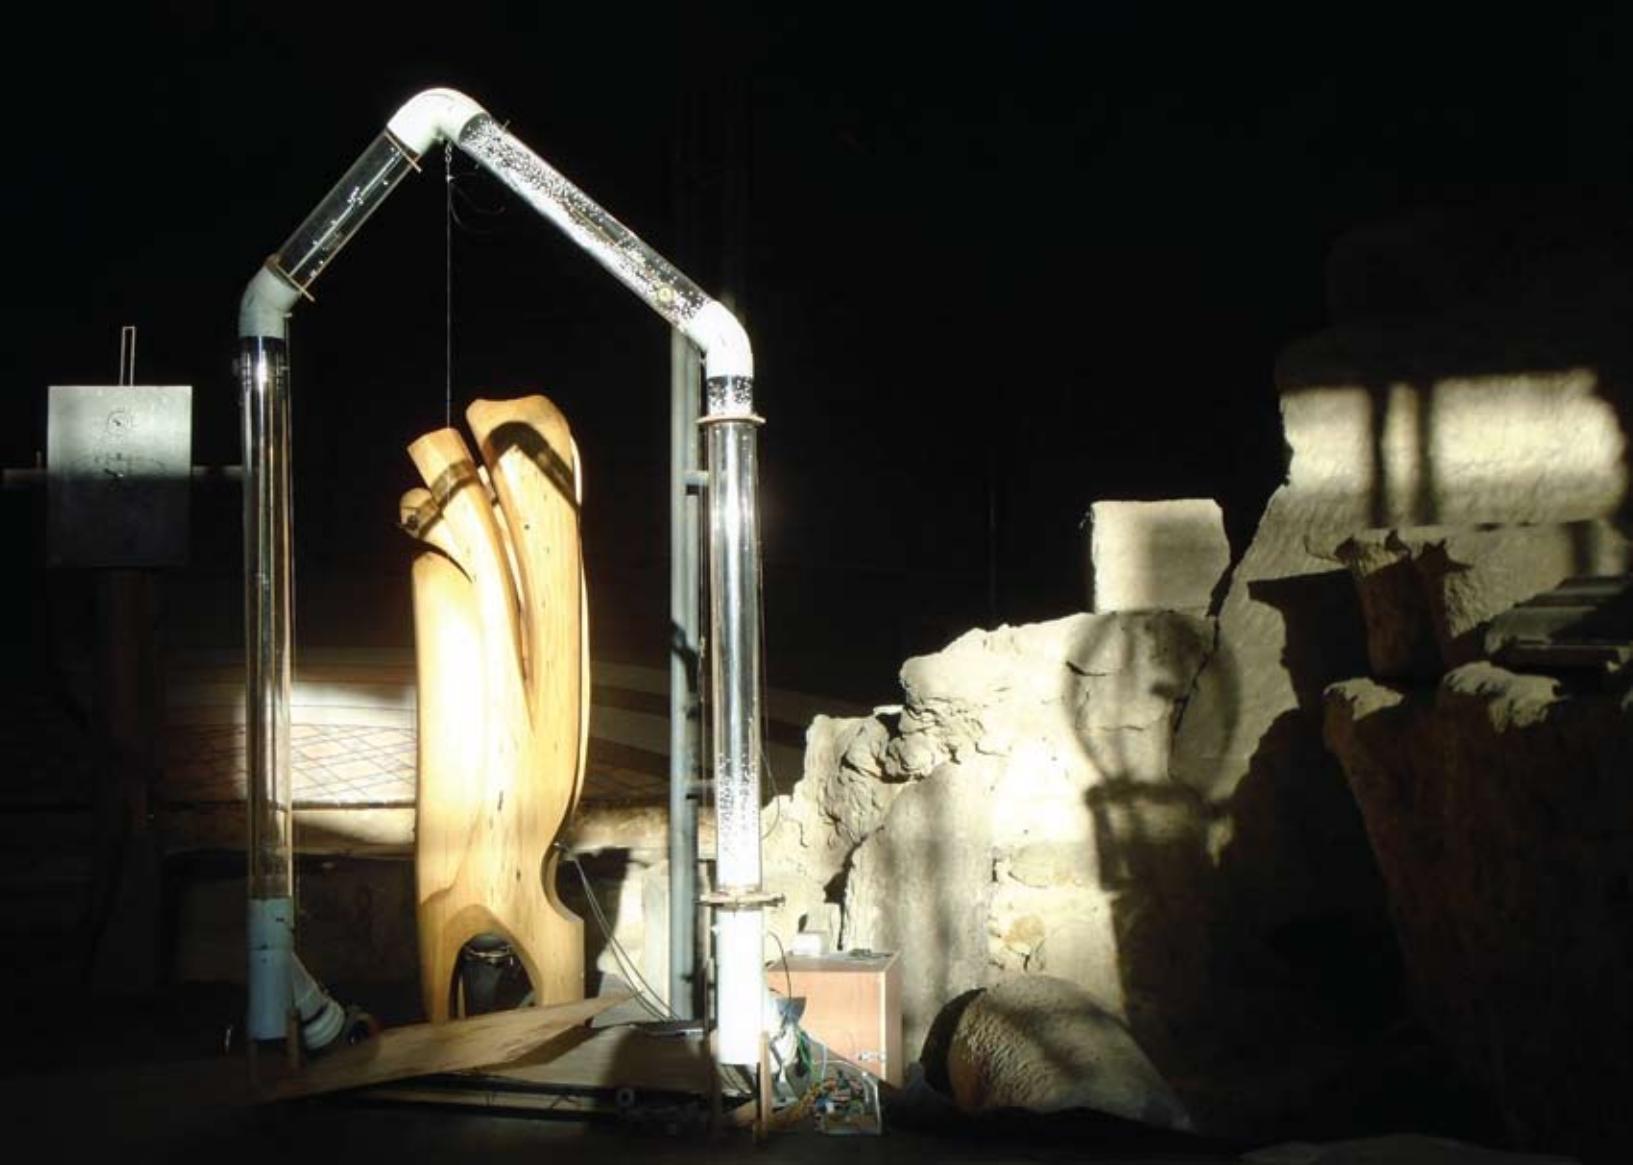

The installation is presented in two complementary forms:

1. A robotized play in which the sculptures are displayed as an exposition, and they play without human intervention.

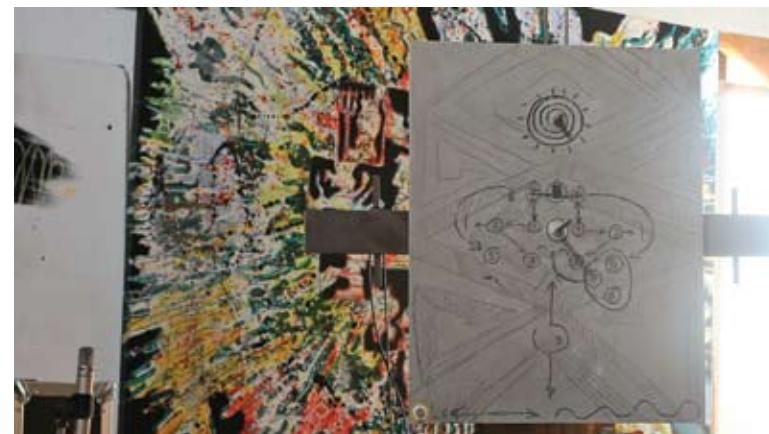

It is an uninterrupted exposition and it shows one part of the sculpture's potential, as well as an evolutional composition conceived for the specific space of the Roman Theatre of Lisboa.

2. A series of performances in which musicians and machines go into osmosis for an extended but delimited time.

This second form will be the result of a composition that will serve as a frame for the improvisation modes as well.

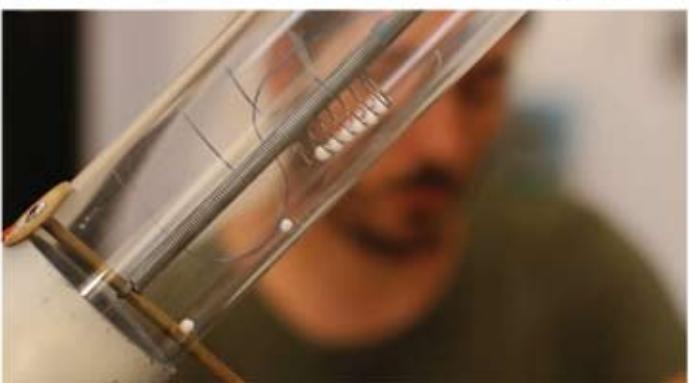

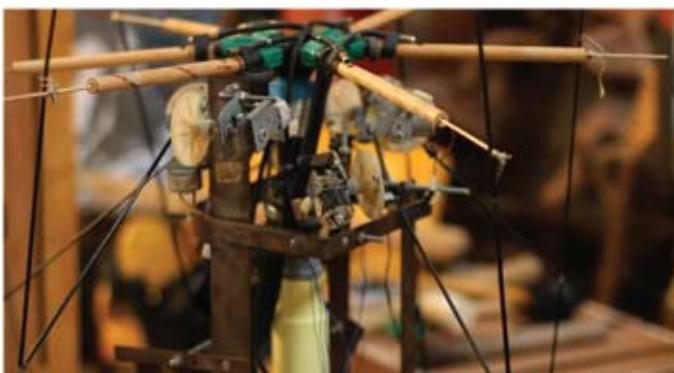

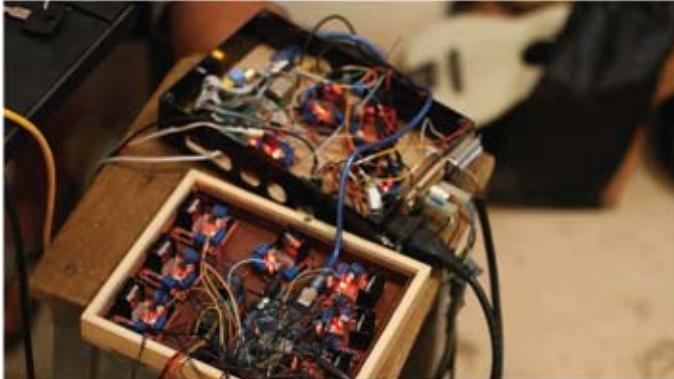

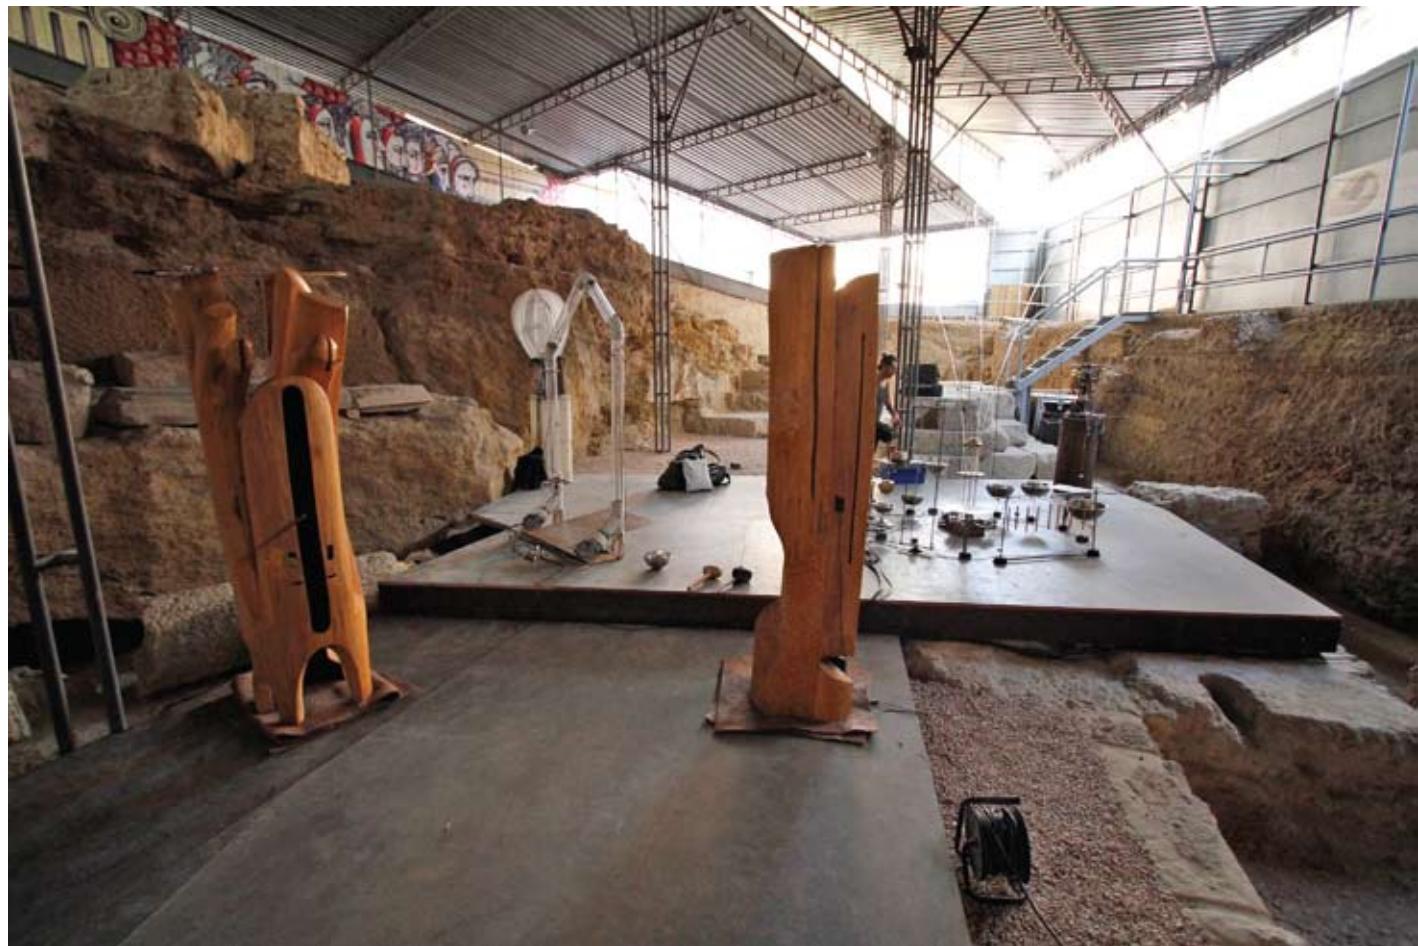

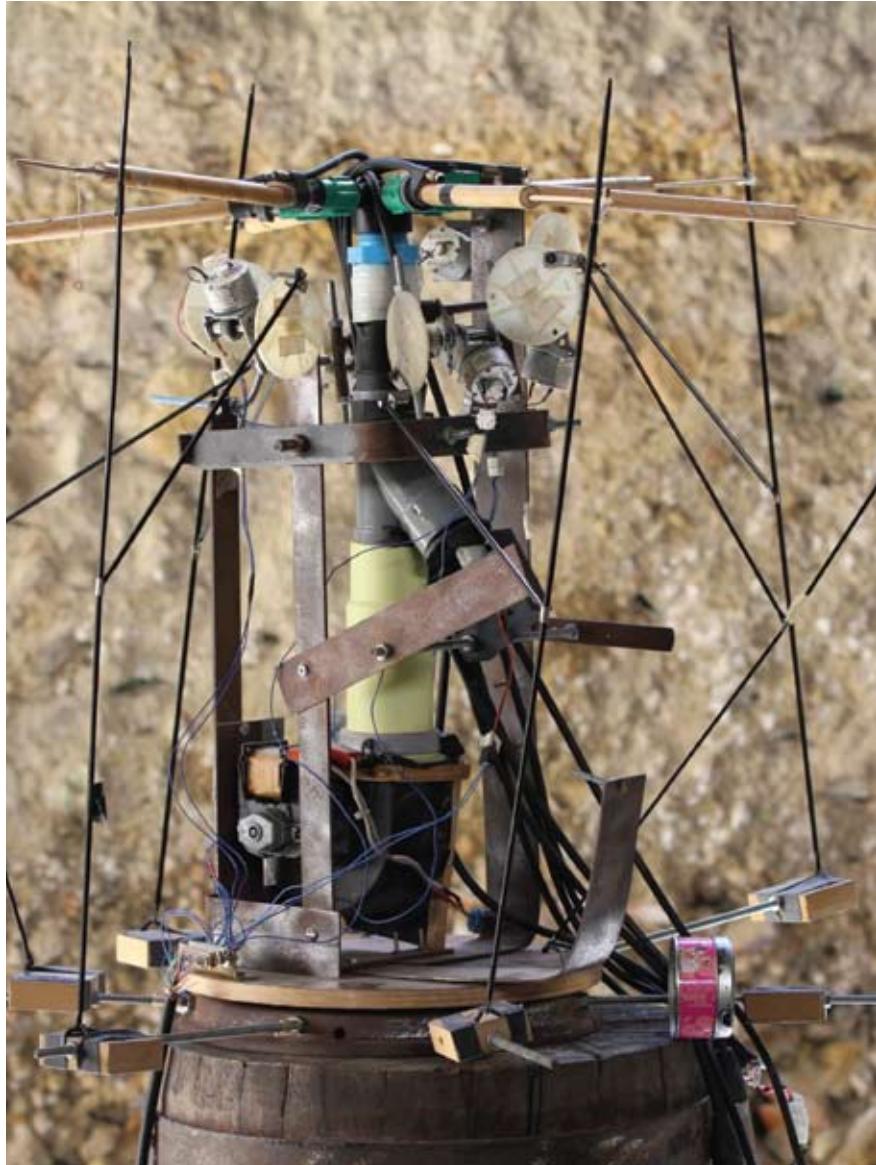

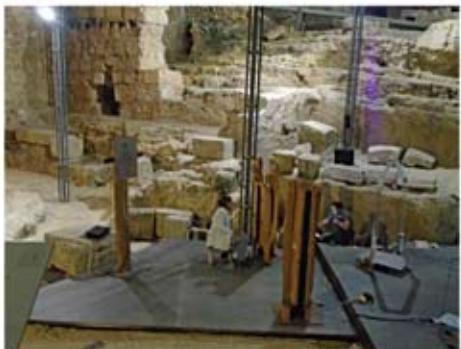

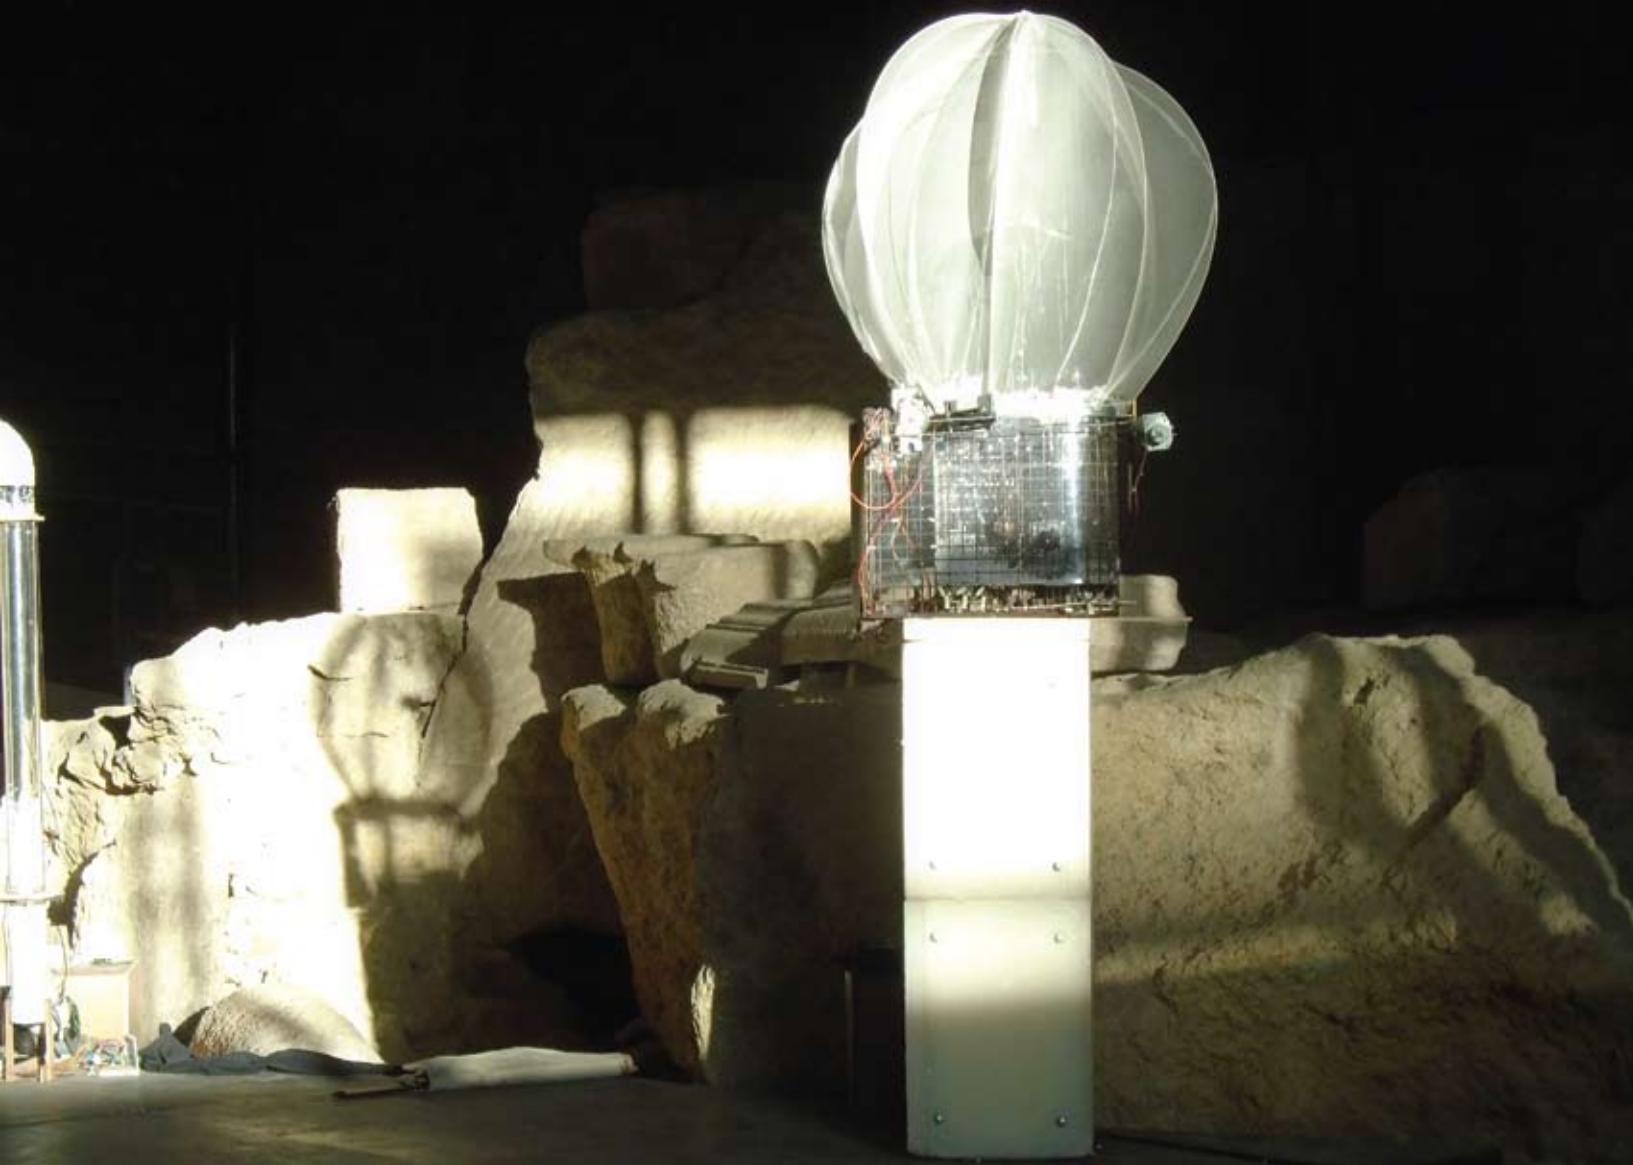

Musician, composer, sculptor, **Vincent Martial** designs and builds sound and visual devices for live performance.

His work is situated at the border of improvisation, electro-acoustics, field-recording, wild lutherie and robotics.

From 2009 he creates artistic forms among which the following:

- Extension: evolutional show that displays a series of robotized sound sculptures in which his work continues to evolve.
- Vatchapuj: music collective that reunites international musicians around improvised music and flexible composition.
- Playa-Azul: plastic and sound interactive installation.
- Siguiendo-la-luna: performative installation.
- Telas: plastic and sound interactive installation.
- Organ-stops: construction of musical instruments inspired in pipe organs and creation of music forms.
- Ctrl-z: collective of musicians gathered around sound installations and new musical forms.
- Insolite: new instruments orchestra.

He collaborates with contemporary artist Tarek Atoui in conceiving new musical instruments, with mathematician Pierre Berger in the creation of sound installations in the field of art/science, as well as with plastic artists Sidhartta Mejia Gúzman and Francesca Cogni.

He works as composer for theater, puppet and dance companies such as L'Ateuchus, Succursale101, Naforo-ba and Théâtre de l'estrade, among others.

His work has been presented in a diversity of artistic scenarios in Europe, Asia and America as are Tate Modern, Centre Culturel de Bélem, Césaré CNCM, Le Cube, Comédie de Reims, TJP Strasbourg, TNG Lyon, Lieu Multiple l'Aeronef, Festival Big Bang Lisboa and Jazzmandu.

His last piece, Pipe-Koto belongs now to the collection of the Tate Modern in London.

He has been staged and has collaborated with artists such as: Hélène Breschand, Tarek Atoui, Thierry Madiot, Ute Kanngiesser, John Butcher, John Leafcutter, Eric Pailhé, Sergio Dias, Uriel Barthelemy, Pharadon Phonamnuai, Olivier Lété, David Aknin, Alexandre Levy, Richard Turregano, Leo Maurel, Travis Diruzza, Bain Champoowong, Sergio Sasso, Fernando Arce, Eiju Kawasaki, Sylvia Cimino and Cesar Alvarado, among others.

Carlos Henrich (Brasil/Alemanha) nasce em 1965 na Suiça. Vive e trabalha em Lisboa desde 1990. Frequentou o curso de Pintura com o Professor Rainer Küchenmeister na Staatliche Akademie der Bildenden Künste, em Karlsruhe, Alemanha, onde em 1988 obteve o grau de “aluno mestre” em pintura. Desde 1986 participa em diversos projectos colectivos com os artistas Uwe Lindau, Georg Schalla e Ralf Bühler, como a apresentação do Projecto de Arte Global 99,999999999% de Espaço Vazio, Kunstverein KRH (DE), iniciando nos ateliers do IWKA, Karlsruhe (actual ZKM), as ESCULTURAS SONORAS. Projecto de Arte Global, com Uwe Fischer, Roland Bauer, Georg Fischer, Morteiro de Maulbronn (DE); InfiltrSom, por João Ricardo de Barros, Navio Gil Eanes, Viana do Castelo, 2009; “Carmo, Chiado e a República Litterária”, Artes na Esfera Pública, por José Quaresma, Museu Arqueológico do Carmo - Lisboa, Sala Vieira da Silva - Paris, por Elsa Bruxelas, Universidades Belas Artes de Lódz (PL) e de Auckland (NZ), por Mark Harvey, 2017; The New Art Fest’17, por António Cerveira Pinto e Ocupart, expondo esculturas e performance musical Picadeiro Oscillated, com Kazike, Picadeiro MUHNAC, Lisboa, 2017.

Exposições individuais sonoras: Ressonância 7.84 (c/ Kazike), 2009, e O Lobo Sentado, 2015, ambas na Travessa da Ermida - Belém, Lisboa.

Desenvolve a temática da “continuidade”- daí a forte presença de erotismo, sementes, pegadas, a ressonância de tudo, ação-reação, som e comunicação sejam uma constante em toda sua obra a nível do macro e micro cosmos, como nas exposições individuais (pintura/ escultura) “Semente |SEED” em 2008, abordando temas como “Boca Letrada-Coração Florido” (arte e educação) ou “Connected Isolation” (em que asas de ferro jorram espuma incessantemente representando a delicadeza e a riqueza da diversidade das identidades culturais em conexão), ou na exposição NOOSFERA (= a fosforescência do pensamento - Pierre Teilhard Chardin) em 2011.

Exposições Colectivas (selecção.): anos 60, 70, 80 e Carlos Henrich, Nelson Cardoso, Shintaro Nakaoka, 2000; ... de Columbano a Paula Rego, 2007; Confrontos, por Rajele Jain, 2010; Africando, por Adelaide Ginga, com a instalação Pai-Sambava, todas na gAD galeria; cria o ARTE OCUPA LISBOA PARIS, ... e também Hamburgo, ação direta/ psicoterapia urbana. Co-curadorias Rajele Jain - PAV 28, Suisse Marocain - 59 Rivoli, Gora Jain - Gängeviertel, residências mai-nov 2010.
